

# Interdepartmental Collaborative Research Project 2013-2014

The Economics Network is leading a collaborative research project during 2013/2014 which will:

- involve 23 UK economics departments;
- explore how economics students' expectations, attitudes and behaviour may have changed (as a result of the changes to funding in higher education and the rise in tuition fees);
- consider how economics teaching and learning practice and curricula might be adjusted to meet emerging needs;
- provide new data, which will be useful for departments to inform internal reviews of their own practices or for further research;
- compile a national dataset and undertake analysis on this to better understand the impact on economics departments of recent funding changes.
